

ALDI Cobh, Co Cork.

The ALDI store in Cobh, Co Cork was extended in 2017. Cork Roof Truss Co were appointed by MMD Construction, Building Contractors to supply the roof trusses. The trusses for these stores have previously been imported from Germany.

The Design, Manufacture and Delivery of this project raised several issues. The truss span was 17.5meters and had to match the existing roof profile. CRT conducted detailed site surveys in association with the Building Contractor to enable our Design team to produce engineered fabrication drawings and calculations.

The trusses were manufactured in our factory and delivered to site on a specialised trailer. The success of this project has resulted in similar repeat business.

Aldi Mitchelstown, Co Cork

The ALDI store in Mitchelstown, Co Cork was extended in 2018. Cork Roof Truss Co were appointed by Stewarts Building Contractors to supply the roof trusses. This was our second such project for Aldi. The experience gained in the previous job was invaluable.

The Design, Manufacture and Delivery of this project raised similar issues to the Cobh site. The truss span was 17.5meters and had to match the existing roof profile. CRT conducted detailed site surveys in association with the Building Contractor to enable our Design team to produce engineered fabrication drawings and calculations.

The trusses were manufactured in our factory and delivered to site on a specialised trailer. The store was fully operational during the building works. The truss delivery was organised for 4.30 am to enable the trusses to be loaded on the roof prior to the store opening for business. The clients and the contractors were very happy with the input from Cork Roof Truss.
